

## INTRODUCTION

PlatR is an **easy-to-use** solution for **reliable manual pipetting** to **microtiter plates**.

It is a ready-to-use product which does not cause any disruptions in the laboratory routine.

PlatR is suitable for **96 and 384 well plates**, including **white plates and strips**.

Its basic purpose is to help lab personnel to **increase throughput**, **minimize errors** and produce **reliable results**.

## SAVE WITH PLATR

Calculated Return On Investment (ROI) in months

1 person pipetting 1 plate per week	ROI (months)
PlatR Basic - pipetting 96-well plates	8
PlatR Basic - pipetting 384-well plates	5
PlatR Full - pipetting 96-well plates	12
PlatR Full - pipetting 384-well plates	7

## PLATR PACKAGE

### PlatR Basic

- PlatR Software Unlimited Licence
- Samsung Galaxy Tab E
- Holder for microtiter plates

### PlatR Accessories

- Inclination stand
- Bluetooth footswitch
- Holder for ELISA strips
- Holder for PCR plates and strips
- Screen foil
- Touch pen

**Software Updates & Support are free of charge**

5 PlatR users that pipette one 96-well plate or one 384-well plate per week can save between \$8,000 and \$13,000 annually.

Task: Preparing plan and pipetting 1 plate per 1 user	Hour/week without PlatR	Hour/week with PlatR	Productivity boost (%)	Weekly savings (\$)	Annual savings (\$)
Preparing pipetting plan	0.5	0.3	83.3	\$13	\$707
Pipetting 96-well plate	0.5	0.4	20.0	\$7	\$353
Pipetting 384-well plate	1.5	1.1	26.7	\$32	\$1,696
Average error rate - 1/96 wells without PlatR	-	-	-	\$9	\$497
Average error rate - 4/384 wells without PlatR	-	-	-	\$4	\$212
<b>96-well plate</b>					<b>\$1,557</b>
<b>384-well plate</b>					<b>\$2,615</b>

\*average loaded cost of researcher per hour (80\$) was used for calculations

## OUR STORY

BioSistemika's story began in 2010 with a group of researchers from the National Institute of Biology in Ljubljana, Slovenia, who believed that laboratories deserve clever software at affordable prices.

We are a multidisciplinary team of PhDs in life sciences and experienced programmers. We add value by understanding our clients' needs for life science data management and therefore develop a reliable, easy-to-use software solutions which are in compliance with all required standards in the field.

In the last 5 years, BioSistemika has launched three products, finished numerous successful software development projects and has been a partner in 3 EU research grants. Our aim is to exceed your expectations and become your trusted partner in the field of laboratory automation and on-demand software development.

**WE BELIEVE  
RESEARCHERS  
DESERVE CLEVER  
SOFTWARE**

We **understand** the challenges of modern labs.

We develop **easy-to-use, tailor-made** software.

We **always deliver** on time and on budget.
